Our goal:
 To provide an exceptional level of service and quality in masonry and concrete Walling.

Incorporating  CONSTRESS

HISTORY OF BIANCO WALLING

Bianco Walling commenced as a small bricklaying contractor (Bianco Bricklayers) in 1994. From a small unimposing yard and transportable office the fledgling business commenced and successfully completed several major projects in around Adelaide. It was these major projects that established Bianco Bricklayers reputation for excellence and service to our clients.

As demand for cost effective construction with tighter time constraints grew, so did the need for innovative construction. As a result a decision was made in 2000 to add concrete wall manufacture to the organization, this resulted in the birth of Bianco Walling. A state of the art facility with the latest technology from around the world was constructed to produce high quality grey precast concrete panels. Further investment in the latest computer technology, dedicated and experienced personnel ensured that Bianco Walling remained at the forefront of precast concrete manufacture.

BEYOND SUPPORT

In July 2004 Bianco Walling acquired Constress a long established company with a sound reputation for the manufacture of high quality architecturally designed precast concrete panels. This has allowed Bianco Walling to compliment its product range and provide our clients with the added convenience of obtaining all their precast concrete requirements in one location.

COMMITMENT TO QUALITY

Bianco Walling is proud of its reputation to provide high quality products. This has resulted from our commitment to utilize the latest technology available, including:

- Advanced European manufacturing technology and CAD/CAM equipment.
- CAD Driven Laser in factory to enable pin point accuracy of panel fabrication.
- In house experienced shop drawers with the latest drafting technology.
- N.A.T.A. accredited laboratory to maximize quality control.
- Two computerized concrete batching plants.
- Four state of the art fully programmable polishing machines.

Norfolk Pine Apartments, Glenelg SA, Value: \$0.35 million. No of Panels: 360, Feature: Grey

Sydney Avenue, Canberra Act, Value: \$0.5 million, No of Panels: 101, Feature: Yellow Sandstone Sand Blasted

Casselden Place, Melbourne, Vic, Value: \$6.0 million, No of Panels: 3050, Features: Polished Beige Panels

RANGE OF FINISHES

With the flexibility of two manufacturing facilities Bianco Walling is able to provide concrete precast panels with a large range of finishes:

- Grey panels
- Washed exposed aggregate
- Reconstructed sandstone
- Sandblasted finishes
- Retarded exposed finishes
- Smooth off-form finishes
- Polished reconstructed granite
- Prestressing

ONSITE STORAGE FACILITIES

Construction programmes are becoming more and more demanding with precast concrete often on the critical path. Our facilities boast large storage capabilities, particularly our Grand Junction Road facility which is situated on 3.2 hectares of land. This provides our clients with piece of mind knowing that panels can be manufactured, stored and called up as required to meet their programme constraints.

THE FUTURE

A long term strategy of investing in up to date technology, materials and construction methods is Bianco's Walling commitment to the future. Further investment and development in our dedicated and experienced people will allow Bianco Walling to continue to meet all challenges and provide our valued clients with the best quality product and service.

COMMITMENT TO SAFETY

The management of Bianco Walling consider QHSE a vital part of their successful business operations. It is our firm's policy that all working activities are carried out with full consideration given to any risks that may arise relating to the environment, health and safety of its employees and other persons.

Management are committed to ensuring that the implementation and continual monitoring of QHSE is given the highest priority.
